

PRIVACY EXPERTS NEEDED – OHT PRIVACY ADVISORY COMMITTEE

August 2022 - The Middlesex London Ontario Health Team is looking to create a Privacy Advisory Committee to assess and review privacy issues related to our upcoming projects and PHIPA (Personal Health Information Protection Act) legislation changes.

The committee would develop documents/templates or processes to ensure current and future projects understand the implications of privacy issues and help to identify privacy challenges. Interested individuals do not need to have a legal background, but should be comfortable in privacy ethics and identifying trouble areas.

The committee would meet once per month for one hour, along with 1-2 hours of preparation time.

As more aspects of healthcare becomes digital, it's important to have privacy-related matters as a pillar of our work. For example, if a project intends to use patient health information, what questions should be asked and understood during project planning?

If interested, please email info@mloht.ca for further details.
