The Middlesex London Ontario Health Team (MLOHT) has updated our strategic priorities to reflect the current needs and opportunities of our community and we are evolving our structure to have a stronger, collective impact with our partners.

Commitment to Population Health Management

Strengthen and innovate the primary care system to ensure all have access to primary care

- Enable growth and maturity of the Primary Care Network (PCN)
- Lessen administrative burden to release time to care and wellbeing
- Integrate access to other key services into Primary Care
- Design and launch plan to offer and deliver attachment to Primary Care for our full population
- Improve access to Primary Care supports and services for people unattached to Primary Care

Connect care to ensure seamless journeys throughout the health system for people to live well at home and in community

- Streamline health and social system processes to improve efficiencies and effectiveness for people accessing care and people delivering care
- Improve Chronic Disease Prevention & Management (CDPM) and navigation by implementing, scaling, spreading, and coordinating HealthPathways, SCOPE, Integrated Care Pathways, and Community Navigation
- Develop and implement centralized referral systems, scale use of eConsult and eReferral
- Support, participate in, and align with Health and Homelessness
- Focus on coordinating health supports for initiatives that divert ED visits and minimize ALC

Design, implement, test, and scale a Community Health Model

- Identify partners willing to build a Community-based health model in an urban and rural context
- Prepare for future Interprofessional Primary Care Team expansions
- Prioritize investment in home & community care
- Embed natural supports, social services, and social prescribing into our health planning to promote whole health, belonging, and wellness (e.g., access to neighbours, faith groups, cultural community, food, transportation, newcomer resources)

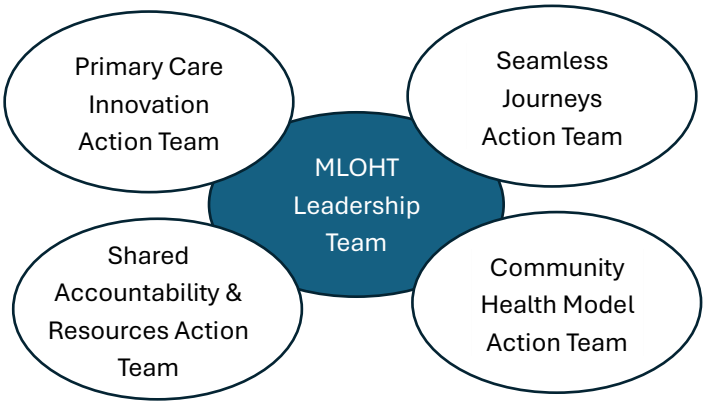

Establish shared partner accountability and optimize our resources as a system

- Establish shared commitment agreements that advance the MLOHT and its strategic plan
- Explore partnerships to optimize back-office services across health service providers
- Enable and evolve the backbone structure of the OHT to support the strategic priorities
- Improve care and reduce costs by intentionally learning and adapting (Learning Health System)

"Golden Threads": Equity, Inclusion, Diversity and Anti-Racism (including rural/urban considerations); Indigenous Health; Patient/Client Voice; Communications; Digital Health; Quality & Analytics

We invite you, our partners, to think about how the priorities and work of you and your organization align with the priorities and work of the MLOHT priorities. How can we work together, collectively, to advance our shared priorities?

Our revised governance structure includes four Action Teams, aligned with the priorities and work outlined above, and a Leadership Team.

Are there people in your organization who should consider co-leading one of our Action Teams, participating in our Action Teams, and/or participating in project or working groups of the Action Teams?

We are currently inviting Expressions of Interest for two Co-Leads for each of the four Action Teams, who will also serve on the Leadership Team.
