

# MLOHT Health Equity Plan

Principles to be taken by the Middlesex London Ontario Health Team for Indigenous, Francophone and all people in need of equity in their health and social needs.

- ✓ We evaluate programs and services to assess and address health inequities in our attributed population.
- ✓ We utilize quality improvement to support lasting change.
- ✓ We recognize the importance of access to services and work closely with partners to achieve this.
- ✓ We seek out barriers to health equity and work with partners to remove them.
- ✓ We promote equity education with all partners and ensure our staff has completed mandatory education and training.
- ✓ We engage with people with lived experience most affected by the projects we are working on.
- ✓ We are committed to diversity in the workplace.
